

Los Angeles Shutter Co.

SHUTTER STYLES / EXTERIOR SHUTTERS

CUSTOM SHUTTERS

THE DESIGN PROCESS: Our salesmen/designers have the knowledge and experience to design each individual shutter panel for optimum appearance, fit, finish and function. Every element is custom. Stiles and rail sizes are determined based on shutter width, height, louver spacing and existing window mullions. Appropriately designed frames, hanging strips and hardware finishes are selected. We not only build the shutters to your exact specifications, but we finish them to your specifications too.

Board & Batten Closed

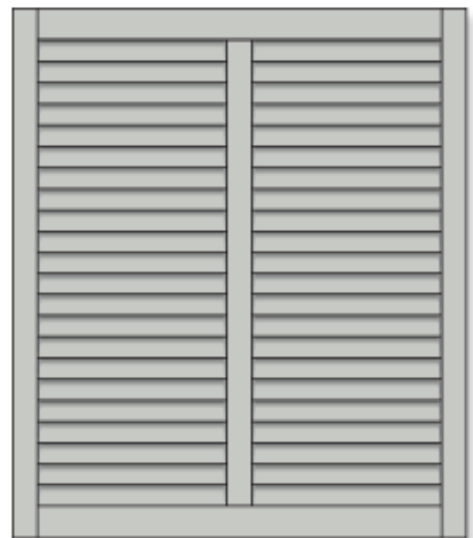

Board & Batten Open

VERTICAL BOARDS:

3" - 5" wide depending on panel width and 1-1/8" thick.
